

# Historical U.S. Methyl Bromide Sales

**Historical Production of Methyl Bromide  
for the United States (1984-1997)**

Year	Sales (metric tons)	Sales (lbs.)
1984	19,659	43,340,231
1985	20,062	44,228,685
1986	20,410	44,995,886
1987	23,004	50,714,618
1988	24,848	54,779,901
1989	26,083	57,502,582
1990	28,101	61,951,465
1991	28,168	62,099,173
1992	25,930	57,165,454
1993	27,037	59,604,717
1994	28,218	62,209,403
1995	25,557	56,342,962
1996	26,187	57,731,860
1997	26,969	59,455,857

**Historical Production of Methyl Bromide in the United States**

## Historical Sales and Consumption of Methyl Bromide -- United States

- North American sales (i.e., U.S., Mexico, and Canada) of methyl bromide for 1984 through 1990 were available from UNEP (1995) and were assumed to be equal to U.S. sales based on relatively low methyl bromide use in Mexico and Canada during this period.
- For the years 1991, 1992 and 1994, total consumption of methyl bromide remained relatively constant. Data from SPD's Allowance and Post Phase-out Tracking System (the tracking system) indicate that the total annual domestic consumption of methyl bromide over this period was approximately 22,000 metric tons. No data were available for the years 1993, 1995, 1996, or 1997; however the estimates presented here were based on extrapolations from existing data.
- U.S. sales of methyl bromide include portions intended for domestic consumption and export.
